### EXAMINER'S AMENDMENT G

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Marks on May 13, 2002.

2. The application has been amended as follows:

Nonelected Claims 86-88<sup>✓</sup> have been cancelled without prejudice towards further prosecution.

3. The following is an examiner's statement of reasons for allowance: The claims are now drawn to molecular arrays with molecular deposition domains smaller than one micron in area which represent preselected locations. The cited prior art of Dontha, which is representative of much of the prior art, teaches deposition of molecules, but does not teach preselected location smaller than one micron for deposition. Other prior art such as Besemer, which teaches bioarray manufacture with preselected locations does not teach domains of less than one micron. In fact, no prior art teaches or suggests selection of preselected domains smaller than one micron. Therefore, the claimed invention is novel and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
